

Washington Market Highlights: Second Quarter 2016

- Existing home sales rose in the second quarter by 14.2 percent to a seasonally adjusted annual rate of 109,359 units compared to last quarter, and rose 3.4 percent compared to a year earlier.
- Building permit activity rose 78.5 percent from a year earlier, totaling 6,627 new units authorized. Of these, 6,342 were issued for single-family units.
- The median price home sold in Washington during the second quarter was \$317,500, 11 percent above a year earlier.
- Housing affordability for both all buyers and first-time buyers decreased from the first quarter of 2016. The All-Buyer Housing Affordability Index stayed above 100 in 37 of Washington's 39 counties. And, first-time buyer's index decreased from both the previous quarter and from the second quarter of last year.
- Inventories of homes available for sale totaled 23,974 single-family homes at the end of the quarter, a 24.8% increase from quarter 1 and a 12.8 percent decrease from a year ago. This inventory level represented a 2.4 month supply, a slight imbalance, where demands exceeds the supply of homes on the market.
- Seriously delinquent mortgages decreased from the second quarter of 2015. The 25,723 Washington mortgages which are at least 90-days past due or in the foreclosure process is 5.6 percent less than three months ago.

Washington State's Housing Market is a quarterly report to the Washington Real Estate Commission and the Washington State Department of Licensing.

Second Quarter 2016
Issued April 2016

Survey Description

Publication: Washington State's Housing Market is a publication of the Runstad Center for Real Estate Studies at the University of Washington.

Coverage: At least quarterly, the Runstad Center receives data on single-family home sales from each multiple listing service located in, or providing market coverage to, Washington communities. In 2012, data on nearly 69,000 home transactions were received and processed.

Sales Volume: Estimated total sales value of single-family homes in each county is compiled using a scale factor to transform the MLS sales to market totals. This scaling is required since a significant number of transactions are always completed as "for sale by owner" or are assisted by real estate licensees who do not participate in a MLS. Scale factors were developed by analyzing the relationship between MLS sales and measures of total single-family sales derived from the 2010 American Community Survey and data from individual county assessors. Data in this report represents closed sales transactions.

Sales Price: Median sales prices represent that price at which half the sales in a county (or the state) took place at higher prices, and half at lower prices. Since the Runstad Center does not receive sales data on individual transactions (only aggregated statistics), the median is determined by the proportion of sales in a given range of prices required to reach the midway point in the distribution. While average prices are not reported, they tend to be 15-20 percent above the median.

Movements in sales prices should not be interpreted as appreciation rates. Prices are influenced by changes in cost and changes in the characteristics of homes actually sold. The table on prices by number of bedrooms provides a better measure of appreciation of types of homes than the overall median, but it is still subject to composition issues (such as square footage of home, quality of finishes and size of lot, among others).

There is a degree of seasonal variation in reported selling prices. Prices tend to hit a seasonal peak in summer, then decline through the winter before turning upward again, but home sales prices are not seasonally adjusted. Users are encouraged to limit price comparisons to the same time period in previous years.

Seasonal Adjustment: Volume statistics are seasonally adjusted using the X-11 method of seasonal adjustment originally developed at the US Bureau of the Census and used for adjustment of most economic statistics by government agencies. The procedure includes adjusting for trading day variation—the number of Mondays, Tuesdays, etc., in a particular month or quarter. This type of variation in the data was found to be significant.

Sales in each county are first seasonally adjusted, then aggregated to yield the statewide statistics.

Seasonal indices are based on quarterly single-family home sales activity dating from Second Quarter 1994. New seasonal adjustment factors are constructed at the conclusion of each year. Data for the three preceding years are revised using these new seasonal factors.

Seasonally-adjusted annual rate values are based on single quarter sales and indicate the number of sales which would take place in a year if the relative sales pace were to continue. They are not a forecast of annual activity and do not include the sales observations of previous quarters.

Metropolitan/Micropolitan Areas: This report uses the definitions of metropolitan and micropolitan areas by the Federal Office of Management and Budget. Briefly, metropolitan areas are larger communities with at least 50,000 people in the urban core. Micropolitan areas are smaller cities, with 10,000-50,000 people in the urban core. Currently Washington has 21 metropolitan counties in 14 metropolitan areas (or divisions) and nine micropolitan areas. Metropolitan and micropolitan area designations were revised in February 2013 based on Census 2010. Some rural counties are now included in metropolitan or micropolitan areas because of commuting patterns.

Month's Supply: Estimates of month's supply of homes on the market compare the number of total MLS listings at the end of the quarter to the seasonally-adjusted annual rate sales for that county [(Listings/SAAR) x 12 = month's supply]. It is interpreted as how long the current inventory available for sale would be able to meet current demand if no additional homes were listed for sale.

Housing Affordability: Two measures of housing affordability are presented. Each should be interpreted as the degree to which a median income family (or typical first-time buyer household) could afford to purchase the assumed home. The following table lays out the assumptions. In all cases it is assumed the lender would be willing to fund the loan so long as the principal and interest payments do not exceed 25 percent of gross income. Index values above 100 indicate housing is affordable to the specified income group.

| | All Buyers | First Time |
|--------------------|--|----------------------------------|
| Home Price | Median | 85% Median |
| Downpayment | 20% | 10% |
| Mortgage Term | 30 years | 30 years |
| Income | Median Family* | 70% Median Household* |
| Mortgage Insurance | No | Yes (add 0.25% to mortgage rate) |
| Mortgage Rate | FHFA estimate of effective rate loans closed, existing homes | |

*Family income is two or more individuals related by blood, marriage, or adoption. Household income includes single persons living alone.

Summary:

Washington state's housing market was very strong in the second quarter of 2016, with sales and new building permits rising compared with a year ago.

The statewide median sales price for a single family home rose to \$317,500 in the second quarter, 11 percent higher than the same time in 2015. This value is greater than the previous all-time high of \$316,700 in the second quarter of 2007.

The seasonally adjusted annual rate of existing home sales rose 3.4 percent from the Second Quarter of 2015—from 105,805 to 109,359. This means that if the quarter's pace continued unchanged for a year, that number of homes would be sold. Although robust, the current annual rate of sales is lower than the high witnessed in 2003.

Home prices rose in 16 of the state's 17 metropolitan counties, decreasing by 2.6% in Chelan County. Jefferson County recorded the highest relative increase of 124.1 percent, followed by King County at 24.3 percent. Median prices were lower than a year earlier in nine counties, with prices in Lincoln County decreasing by 23.5%.

Given the variety of location and market diversity in the state, median housing prices are highly variable, ranging from \$65,000 in Lincoln County to \$568,400 in King County (San Juan County has the second highest median values at \$420,800).

Housing affordability was lower in the second quarter than

both last quarter and last year. That index—where 100 means a middle-income family can just qualify for a median-priced home, given a 20 percent down payment and a 30-year fixed mortgage rate at prevailing rates—was 133.7, up from 143.4 in the first quarter of 2016. This metric suggests that, given the same down payment and mortgage, a middle-income family can afford a home selling for 33.7 percent above the median.

Statewide, the first-time buyer index showed a decrease of 6.6 points, ending the quarter at 76.3. This index assumes a less expensive home, lower down payment and lower income. This means that a household earning 70 percent of the median household income—as may be true of first-time buyers—had only 76.3 percent of the income required to purchase a typical starter home statewide.

Housing affordability varied widely across the state. The least affordable county for both average and first time home buyers is San Juan, with Lincoln County the most affordable. Twenty-three counties, especially those in the central Puget Sound, present affordability issues for newcomers.

Affordability remains a challenge in the state's housing market. This is contrasted with strong quarterly permitting activity of 6,627 new units, primarily in multifamily housing units in metropolitan areas, marking a 78.5 percent increase in the number of units under construction compared to a year ago.

Washington can be described as three states, including trends for Metropolitan, micropolitan, and other areas (map below). It can also be three states, with differing challenges for eastern Washington, western Washington, and the central Puget Sound. The nature of this report has been changed so that reader's can more easily pull out the information they need, especially for variances in location.

Home Resales:

6 of 39

Number of counties with a quarter-over-quarter decrease in seasonally adjusted sales.

14.2%

Quarter-over-quarter increase in seasonally adjusted annual sales.

33.3%

Largest drop in seasonally adjusted quarter-over-quarter sales seen in **Lincoln** County.

109,359

Seasonally Adjusted Annual Sales (SAAR).

150

Largest drop in seasonally adjusted quarter-over-quarter sales in absolute terms seen in **Walla Walla** County.

3.4%

Year-over-year increase in seasonally adjusted annual sales.

Five

Number of counties with sales rates at least ten percent lower than the previous quarter.

31 of 39

Number of counties with quarter-over-quarter sales increases.

2 of 17

Number of Metropolitan Counties with fewer sales than the previous quarter.

600%

Largest quarter-over-quarter gain in seasonally adjusted sales seen in **Columbia** County.

95,730

560

Largest quarter-over-quarter sales gain in absolute terms seen in **Clallam** County.

Seasonally adjusted annual sales rate in the 17 Metropolitan Counties (**87.5 %** of state total).

Ten year time trend (Q3:2006–Q2:2016)

SAAR & Yearly Change by County

Housing Construction:

6,627

Number of building permits issued during the quarter.

78.5%

Increase in year-over-year total number of permits.

26.9%

Increase in quarter-over-quarter total number of permits.

84.5%

Decrease in year-over-year multi-family permits (**1,552** fewer units).

238.1%

Increase in year-over-year single family permits (**2,914** ad-

ditional units).

\$2,528,977,042

Total value of permits, **42.2% increase** over last quarter).

\$1,808,083,228

Total value of single family permits, **28.8% increase** over last quarter).

\$720,893,814

Total value of multi-family permits, **92.2% increase** over last quarter).

\$285,097

Average value of permitted single family home.

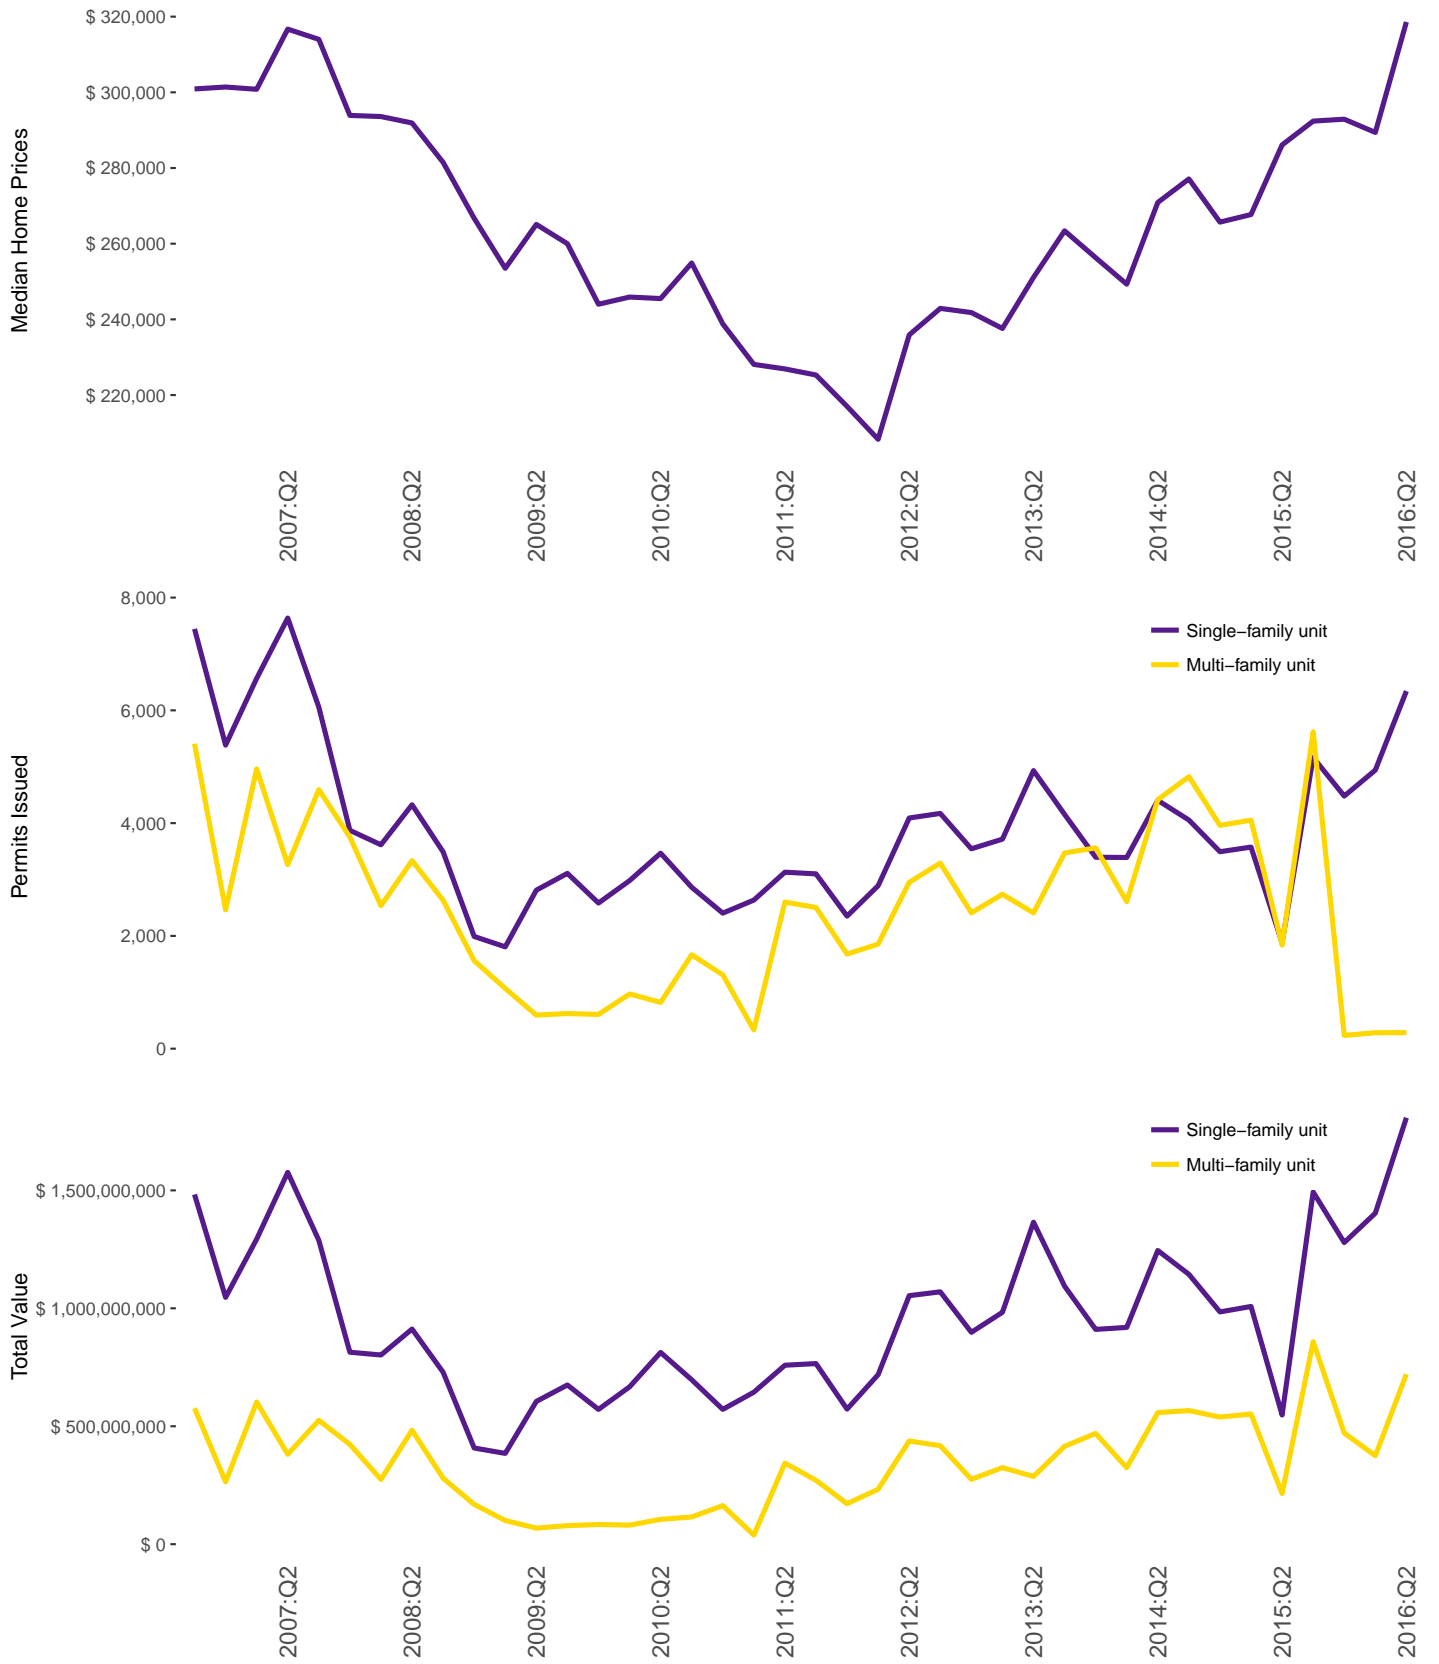

\$2,529,452

Average value of permitted multi-family home.

39.6% & 62.4%

Value of permits in King County, and in the central Puget Sound, as compared to the state.

Ten year time trend (Q3:2006–Q2:2016)

Home Prices:

\$317,500

Median selling price of a single family home.

11%

Year-over-year **increase** in median selling price of a single family home.

2.5%

Year-over-year **decrease** in the Federal Housing Finance Agency (FHFA) repeat sales index.

\$568,400

Highest median price in the state seen in **King** County.

\$65,000

Lowest median price in the state seen in **Lincoln** County.

\$182,500

Lowest median price in a Metropolitan county seen in **Asotin and Garfield** Counties.

\$153,300–\$318,800

Range of prices in Micropolitan areas (**Adams to Island**).

Two of Nine

Number of counties with year-over-year price declines of more than ten percent.

Fourteen of Thirty

Number of counties with year-over-year price increases of more than ten percent.

8.3%, 7.6%, & 6.9%

Year-over-year price increase in eastern Washington, Western Washington, and the central Puget Sound.

Big Players

Increases for the five largest counties by sales volume:

King 14.7%

Pierce 9.3%

Spokane 7.0%

Snohomish 9.5%

Thurston 8.7%

Prices by Bedroom:

\$218,700

Median price for a 2-bedroom single family home, a **16%** year-over-year **increase**.

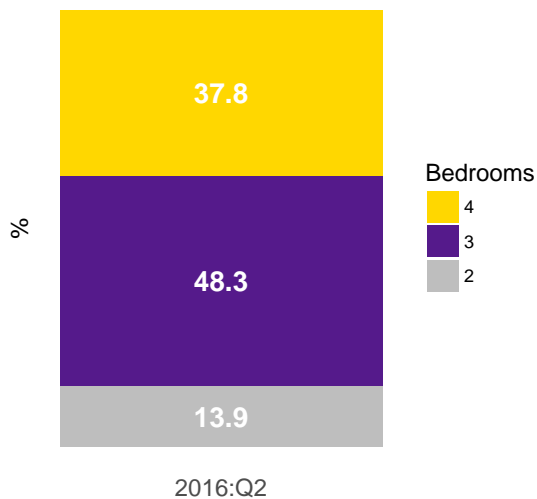

\$286,900

Median price for a 3-bedroom single family home, a **12.1%** year-over-year **increase**.

\$394,800

Median price for a 4-bedroom single family home, a **7.7%** year-over-year **increase**.

Sales by Number of Bedrooms

2 of 17

Number of Metropolitan counties with price declines in 2-bedroom homes.

32.1%

Biggest decline in price of a 2-bedroom home in a Metropolitan county, seen in **Douglas** county (down to **\$140,000**).

Three

Number of Metropolitan counties with year-over-year price increases of 20% or more (**Clark, Kitsap, and Skagit** counties).

Two & Two

Number of Metropolitan counties with price declines in 3-bedroom and 4-bedroom homes.

Housing Affordability:

lower than a year ago.

92.3 & 130.4

Lowest affordability index values in Metropolitan (**King**), and micropolitan (**Benton**) counties.

1

Annual decrease in mortgage interest rate basis points (bps).

76.3

Statewide first-time housing affordability index, **down** from the previous quarter, and **down** from last year.

11%

Year-over-year increase in home prices.

16 of 39

Number of counties with a first-time affordability index greater than 100 (affordable).

Worse & Worse

Statewide all-buyer housing Affordability as compared to last quarter, and last year.

133.7

Statewide all-buyer housing affordability index.

53.2 to 113.5

Range of values for first-time affordability among Metropolitan Counties. Low in **King** county, and high in **Benton** county.

90.6 to 484.1

Range of affordability index scores across the state, low in **San Juan** county, and high in **Lincoln** county.

66.9 to 121.5

Range of values for first-time affordability among micropolitan Counties. Low in **Mason** county, and high in **Lewis** county.

28 of 39

Number of counties with statewide all-buyer affordability

Ten year time trend (Q3:2006–Q2:2016)

Availability of Affordable Housing:

\$76,400

Statewide median family income

\$48,200 to \$94,400

Range of median family income values. Low in **Adams** county, and high in **King** county.

\$61,397

Statewide median household income

\$26,222 to \$79,462

Range of median household income values. Low in **Ferry** county, and high in **King** county.

Available Inventory:

23,974

Number of homes available for sale at the end of the quarter.

3,507 & 4,769

Decrease from last quarter (**12.8%**), and **Increase** from last year (**24.8%**).

2,304 & 3,140

Largest available inventories seen in **Spokane** county, and **King** county. **Down 7.6%**, and **down 16.8%** from last quarter.

Seven of Seven

Number of counties with more than 1,000 listing that had an increase over last quarter.

55.3%

Largest relative increase in listings seen in **Clallam** county (**320** units).

4 of 39

Number of counties with a decline in listings since the last quarter.

2.8%

Statewide inventory priced below \$80,000, **decreased** from 3.7% from a year ago.

15 of 39

Number of counties with less than 2% of homes priced below \$80,000.

0% & 0.8%

Homes in **King** and **San Juan** counties below \$80,000.

14.1%

Statewide inventory priced below \$160,000, **decreased** from **18.2%** a year ago.

0.0% to 41.4%

Range of availability of homes below \$160,000 in Metropolitan counties. High in **Pierce** county.

100%

Largest decline since last quarter, seen in **Wahkiakum** county.

3 of 39

Number of counties with declines in listings greater than 20%.

2.4

Month's supply of housing. **2** last quarter, and **2.9** last year.

0 to 123.7

Range of month's supply across the counties—low in several counties, high in **Walla Walla** and **Columbia** counties.

Seven

Number of counties with less than five month's supply of homes priced over \$500,000 (**Cowlitz, Grant, King, Kitsap, Spokane, Walla Walla, and Yakima**).

3 & 3

Numbers of counties with more than a year's supply of homes, and more than a year's supply of homes priced over \$500,000.

Ten year time trend (Q3:2006–Q2:2016)

| Yakima | 1,900 | 11.8 | 3.3 | 99 | 266.7 | \$184,200 | 8.6 | 161.8 | 93 |
| Statewide | 109,359 | 14.2 | 3.4 | 6,627 | 78.5 | \$317,500 | 11 | 133.7 | 76.3 |

1. Home Resales are Runstad Center estimates based on MLS reports or deed recording.

2. SAAR means data presented at Seasonally Adjusted Annual Rates allowing qtr-to-qtr comparison.

3. Building permits (total) are from the U.S. Department of Commerce, Bureau of the Census.

4. Median prices are Runstad Center estimates of the point at which half of existing home sales occurred at higher prices and half at lower prices.

5. Affordability index measures the ability of a typical family to make payments on median price resale home. It assumes 20% downpayment and 30-year amortizing mortgage. First-time buyer affordability index assumes a less expensive home, lower downpayment, and lower income.

6. Whitman, Benton, and Franklin Counties figures cannot be compared to reports released prior to Q2:2015.

Source: Runstad Center Estimates

Housing Affordability Index measures the ability of a middle income family to carry the mortgage payments on a median price home. When the index is 100 there is a balance between the family's ability to pay and the cost. Higher indexes indicate housing is more affordable.

All loans are assumed to be 30 year loans.

All buyer index assumes 20% downpayment. First-time buyer index assumes 10% down.

It is assumed 25% of income can be used for principal and interest payments.

WCRER Estimates

Notes: Housing Affordability Index measures the ability of a middle income family to carry the mortgage payments on a median price home. When the index is 100 there is a balance between the family's ability to pay and the cost. Higher indexes indicate housing is more affordable.

All loans are assumed to be 30 year loans.

All buyer index assumes 20% downpayment.

It is assumed 25% of income can be used for principal and interest payments.
